The whole truth of the real story

Thorn's '9/11 Evil' first major book to implicate Israel in 9/11

[9-11 Evil](#)

Finally, a book about 9/11 that actually talks about the real perpetrators of that bloody swindle!

Victor Thorn's new blockbuster "9-11 Evil" bills itself as "the most dangerous 9-11 book ever written" and is exactly that, because it blows the lid off the media suppression of Jewish involvement in the greatest crime ever perpetrated against the American people.

Thorn, who with his partner Lisa Guliani have propelled their WING-TV Internet newscast into one of the most reputable on the web, is fast becoming the Ralph Nader of the 9/11 movement, after his many a celebrated outings of corporate shills Mike Ruppert and Alex Jones. Thorn writes:

"The attacks on New York City and Washington DC nearly five years ago were only the beginning, and if we don't fully recognize who the real enemy is and stop it dead in its tracks right now, I guarantee that at some point in the near future, we won't have another opportunity such as this to save ourselves."

What does Thorn's book do that all the other voluminous examinations of 9/11 don't do?

It points the finger squarely at the Mossad, at Israel, and Jews in general. The crime of the century has many co-conspirators.

What did happen on 9/11? Thorn writes:

1. The WTC Towers did not collapse due to plane hits or fire. " ... they were crippled by controlled demolitions that were well planned **in advance**."
2. Flight 77 did not strike the Pentagon.
3. The crash site in Pennsylvania was not caused by Flight 93.

Thorn lists the best 9/11 books that form the core of his research, and sources the most reputable empirical 9/11 researchers, those who don't wander into fanciful high-tech explanations. Prominent among his sources are author Michael Collins Piper and webmaster Michael Rivero, whose [whatreallyhappened.com](#) website has provided a news package as reliable and focused as any site on the web.

With the same everyman panache that made his previous 9/11 book, "9/11 on Trial" such an easy and valuable read, Thorn creates composite dialogues that flesh out the utter ludicrousness and savage betrayal that the official story inflicted on free people everywhere.

Why are Israel and the Mossad and Jews in general all behind the 9/11 caper? Thorn answers with a thorough survey of all the existing evidence, beginning with Netanyahu's snide comment on the day of the tragedy. "It's very good," he said, referring to the event's benefit to Israel.

Why were so many Israelis apprehended around the U.S. shortly after the attacks in suspicious circumstances all magically released and flown home to Israel?

And why does the 9/11 skeptics movement, anchored by commercial, pro-Israel shills like Alex Jones and Meria Heller, remain silent on this all-important question?

Thorn's interpretation of how the entire 9/11 skeptics movement has been "diverted in an array of convoluted directions" provides an important checklist of hazards awaiting new researchers.

1. Vague descriptions of the masterminds of permanent war like "New World Order" deflect from identifying the real perps.
2. Popular media personalities insert their agendas into mass movements.
3. Use a religious figure to accurately describe what happened on 9/11, but he fails to mention the most important point, namely, who did it.
4. "Use paid back-room moles to infiltrate every possible 9/11 chatroom, message board, and forum to create as much din, disruption, "noise", and chaos as possible which constantly litters and pollutes the soup, effectively preventing most people from focusing on Israel's central role in 9/11."
5. Minutia, rhetoric, and circular arguments "to lead people down a maze of endless rabbit holes."

So who did 9/11? Thorn writes:

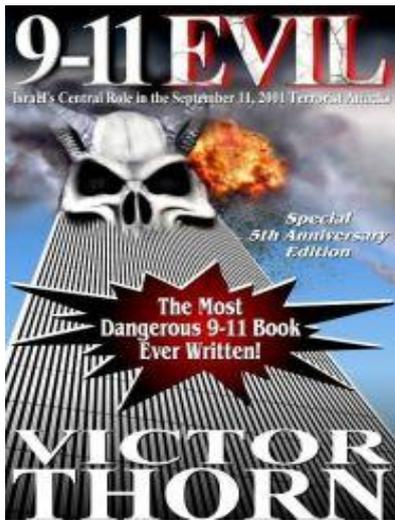

"... 9/11 was an intricately planned act of state-sponsored terrorism concocted by a foreign government (Israel) in unison with an ardently loyal faction of neocon crazies who had burrowed their way into the Pentagon."

This book is all you need to know but were afraid to ask. It will help you realize that if you don't ask that question, it will soon be too late.

"9/11 evil is Israel," he flatly declares, and concludes his broadside with an extremely long list of Israeli atrocities, concluding with:

"The Talmud granting permission for Jews to cheat, steal from, kill, and deceive non-Jews."

Of all the 9/11 analyses I've read to date, this book comes the closest to telling the whole truth of the real story, and puts the gory details into their proper historical context. You won't read this stuff anywhere else.

American Free Press Reviews 9-11 Evil: by John Tiffany

Who was really behind the controlled demolition of three buildings of the World Trade Center on September 11, 2001, along with the other incidents in Pennsylvania and at the Pentagon? In his new book, *9-11 Evil: Israel's Central Role in the September 11, 2001 Terrorist Attacks*, Victor Thorn points his finger at the one entity that most other authors (even in the so-called 9-11 truth movement) prefer not to even mention: Israel.

Thorn and his co-author Lisa Guliani make a convincing case that Israel-firsters were responsible for the mysterious Pentagon stand-down that allowed the “attack on America” to proceed.

Thorn and Guliani also contend that Zionists infiltrated Air Force One and threatened President Bush on the morning of September 11, 2001 with electronic capabilities even more sophisticated than those of the NSA.

Many patriots, who rightly dismiss the impossible official 9-11 explanation as a mere conspiracy theory, alas, are convinced that the real 9-11 plot was hatched with the selection or election of George W. Bush in 2000. In reality, writes Thorn, it is an integral part of a Zionist cluster of conspiracies going back at least to the 1960s, and Bush is merely a puppet playing his small part in the overall scheme.

In one gem from the book, the authors point out that a series of power-downs occurred in the WTC towers on the weekend prior to 9-11. With the electricity knocked out, the security cameras, electric locks and other security devices were disabled. This means an ideal opportunity existed for agents to go through the buildings, planting bombs. Thorn says the evidence for this comes from the statements of Scott Forbes, a computer analyst for WTC occupant Fiduciary Trust.

Thorn adds that the first suspects arrested within hours of the attack were the “Dancing Israelis,” the Israelis on the roof of the buildings who were seen laughing and pointing to the WTC as it was falling. The man who eventually freed them was Michael Chertoff, whose family was involved in the creation of the state of Israel.

Also involved is a demented wealthy-beyond-wealthy rabbi, Dov Zakheim, say Thorn and Guliani. Zakheim, they tell us, is the man who filched more than \$2 trillion (yes, that's trillion) from the Pentagon, making him the biggest thief in history.

Zakheim, former comptroller in the Office of the Undersecretary of Defense, was one of the architects, along with some other rabid Zionists, of a document called *Rebuilding America's Defenses: Strategy, Forces and Resources for a New Century*, published by the Project for a New American Century. This document, which has been dubbed the blueprint for the 9-11 attack, called for “some catastrophic and catalyzing event – like a new Pearl Harbor” as being necessary to foster the frame of mind needed for the American public to finance and die in a war in the Middle East that would politically reshape the region for the benefit of Israel and Zionists in power in the United States.

Israeli firms were in charge of security at the WTC and airports on 9-11, writes Thorn. The media involved in covering everything up is dominated by Zionists. The lease on the World Trade Center

complex had been purchased not long before the attack by Larry Silverstein, a Zionist, whose mortgage holder in turn was a Zionist. Silverstein had direct ties to two of Israel's most hawkish prime ministers: Ariel Sharon and Benjamin Netanyahu. The man who arranged the deal was a Zionist, plus the CEO of the Blackstone Group, which was heavily involved, was a Zionist.

After reading *9-11 Evil* – which is dedicated to AFP correspondent Mike Piper – it is hard to deny Israel's involvement in this act of state-sponsored terrorism. Thorn and Guliani offer a crescendo of evidence demonstrating that 9-11 was not only an “inside job” executed by Israeli-loyal “neo-cons” within the U.S. government, but also an “outside job” leading directly to the doorstep of the nation of Israel.

Comments from Professor Jim Fetzer - *Scholars for 9-11 Truth*

On October 18, 2006 WING TV interviewed Professor Jim Fetzer of the *Scholars for 9-11 Truth* where he made the following comments in regard to Victor Thorn's *9-11 Evil*:

Fetzer: I am very glad to tell you that it seems to me that there is a wealth of information here. I felt I was learning from almost every page. It tends to provide a very substantial case in support of the proposition you have just enumerated, where the key thesis of your book appears on page 70:

“9-11 was an intricately planned act of state-sponsored terrorism concocted by a foreign government, Israel, in unison with an ardently loyal faction of neocon crazies who had burrowed their way into the Pentagon, State Department, and White House. Assisting them were a host of defense contractors, computer gurus, and explosives experts who made the whole thing happen on the morning of September 11, 2001.”

Fetzer: Now I think the way you patiently lay out your case, including the ‘Dancing Israelis’ and the Urban Moving Systems and the connections between Larry Silverstein and Benjamin Netanyahu and Ariel Sharon and all of this, is extremely persuasive.

Fetzer: I would encourage anyone who wants to take a serious look at the hypothesis that Israel, that the Mossad in particular, played a key role in 9-11 as you're suggesting, ought to take a good look at this book and that additional support (at st911.org) under the category of Foreign Perspectives. I think I would recommend every serious student of 9-11 needs to read your book, Victor. And let me just explain why, from the point of view of scientific reasoning, I think your book is so important. This, of course, is my principal area of research. I've published 27 books, and a lot of them have been on the theoretical character of scientific knowledge. So, scientific reasoning, in general, is a pattern that falls into four steps or stages. First, there's puzzlement. You encounter a phenomenon you don't readily understand, you're not able to integrate with your background knowledge and beliefs. A puzzlement in this case would arise over the events in New York, at the Pentagon, and in Shanksville on 9-11. Then there's speculation. Speculation is the crucial stage of considering the full range of alternative of possible explanations. Now, one possible explanation that the government has given us is that the plane impacts plus the jet fuel fires led to the weakening or melting of the steel, which led to a pancake collapse, and the buildings fell. That's a hypothesis. An alternative hypothesis would be

that the buildings actually came down by controlled demolition – not of, in this case with regard to the Twin Towers, of a conventional kind where you’re blowing buildings – blowing them up or bringing them down from the bottom up; but in this case from the top down, for which there’s an enormous amount of evidence. And then of course we have Building 7, which was a conventional kind of controlled demolition, a building blown up from the bottom up.

Now, once we establish that the events in New York in particular, and the Pentagon and in Pennsylvania do not accord with the government’s account, when you adapt them to the evidence - which is the third stage – you’re taking the alternative hypotheses and adapting them to the available evidence, where the government has been going way out of its way to make sure that we don’t have all the evidence that ought to be available. Just reading through that petition (on ST911.org) you realize how massively the government has withheld evidence. And past the stage of adaptation, once you establish which hypothesis receives strongest support than the alternatives, once the evidence settles down, you’re entitled to accept the preferable hypothesis, albeit in the tentative and fallible fashion characteristic of science, which means if new hypotheses are advanced or new evidence becomes available or you discover some of your old evidence really turned out to be fabricated, faked and has to be jettisoned, then you can revise the situation based on logic and the new body of evidence.

Fetzer: Now, what’s crucial about your book, there’s been an utter failure to take very seriously the hypothesis that when it comes to those who were involved in bringing about the events of 9-11, that the Mossad or the Israeli government could have had a key role to play. And that seems to me to be extremely important and very well investigated in your book. So when I recommend your book, it’s not that I’m saying I think everyone should believe everything you have to say. I have a few questions I would hope to pose to you today, but I am saying this is extremely important in giving what I would call a very nice preliminary outline of evidence that tends to suggest that, even in some cases, strongly supports the hypothesis that the Mossad and the Israeli government had a very intimate role to play in the events of 9-11.

Fetzer: I want to say I’m very proud of you for authoring this book, Victor. I think it’s very, very well done; and even though I wouldn’t imply that it’s the last word, I think you have done some tremendously important work in opening up an area of investigation that we cannot shy away from. If we want to understand the truth, we have to confront the full range of alternatives, and frankly I don’t see how we can have a complete explanation of what happened on 9-11 without taking into account the role of the Israeli government in contributing to bringing about these events.

Fetzer: I would encourage everyone with a serious interest in 9-11 to read your book. Your book is mind expanding. It requires you to stretch your intellect to encompass alternatives you might prefer to ignore. =====

Review: Michael Langston

Victor Thorn's new book, *9-11 Evil, Israel's Central Role in the September 11, 2001 Terrorist Attacks*, takes 9-11 research and reporting to a whole new level by providing much-needed answers to the most crucial questions regarding the attacks of September 11: exactly WHO planned and carried out this abominable crime against humanity, and WHY in God's name would anyone do something this

horrible? What was the psychology and the psychopathology involved? How did the perpetrators rationalize these unconscionable acts of mass murder? What were their sinister and evil motivations? And who - above all others - stood to benefit most from this heinous crime against all of humanity? For when we answer that one critical question of who benefited most, we most likely have answered the ultimate question: who was the perpetrator?

We already know the "how" of September 11. Other researchers, including Victor Thorn himself in a previous book, *9-11 on Trial*, which discussed the collapse of the WTC towers and Building 7, have thoroughly exposed the forensics of 9-11, such as the fact that the Twin Towers were brought down in a controlled demolition, that no Boeing 757 impacted the Pentagon, and that Flight 93 - or whatever it was - was most likely shot down and did not strike the ground intact in Shanksville, Pennsylvania, as we were told by government and media sources.

These are relatively easy questions to answer, and the 9-11 "Truth Movement" has done a fairly good job of answering them, but the question of "who" is a much more difficult one to deal with, because it involves actually pointing the finger of blame at the actual perpetrators themselves, at the specific, ruthless individuals and entities that were criminally liable. This takes tremendous courage to directly confront evil of this magnitude, and the author of this book should be commended for doing so.

Too often when we ask this vital question of who the actual 9-11 perpetrators are, we are offered vague, nebulous, non-specific answers, such as the "globalists" did it, or the "New World Order" was to blame. Either that or we're told that "Bush," "Cheney," or the "Bush Administration" are the individuals or entities that were ultimately responsible. This serves only to muddy the water and to distract our attention away from the actual perpetrator.

The cold, hard facts laid out in this book, which may very well turn out to be the most important ever written on the subject of 9-11, lead the reader to only one conclusion:

Israel did it, and ISRAEL ultimately is the 9-11 Evil.

Chatter, chatter, chatter? Talk, talk, talk? It is incessant and part of this thing known as the Western culture. It would be fine were it not for the fact that there is so much pointless talk taking place-- Which movie star has just spent a fortune on a new wardrobe for a pet monkey? Which politician in Washington is introducing a bill that would require institutions of higher learning that receive taxpayer funds to offer courses in the proper way to scrub toilets?

And of course, the whole business involving the 'war on terror' and everything that took place on 911...

Go to such-and-such website and they lump this thing known as WW III in with aliens from outer space, Bigfoot, 'Nessie' and the reptilians. Read this book written by this 'expert' wherein he claims that EVERYBODY but himself and his mother are working for the CIA?

Like I said, chatter, chatter, chatter? talk, talk, talk, and nothing of any substance gets said, and in the meantime, the world burns and innocent people suffer.

But not all is lost. In this search for the 'golden nugget' of truth, it is unavoidable that we are going to run into a lot of 'fool's gold' along the way. It is all part of the business. But now, after finding about a thousand pieces of this junk within the 9-11 truth movement, we who are choosy shoppers for the truth have found a nice little gem--honest to goodness stuff that can be used as valuable currency, and it is a new book written by Victor Thorn of www.wingtv.net entitled *9-11 Evil*.

What makes this book so much different from all the other books that have been written in the last five years? Simple--it goes to the root of the problem, not the symptoms. While everyone else is chattering on about big oil, Dick Cheney, George Bush and all the other pustule sores that have erupted on the body, *9-11 Evil* goes right to the virus, which just so happens to be the most taboo of all subjects these days, and it is Israel and the Pharisical principles that form the lifeblood of this terrorist nation. Thorn pulls no punches in putting the blame where it belongs for the present circumstance known as Armageddon that is taking place right now. It is the nation of Israel and the Pharisical mindset that governs her that is the fountain from which all these troubles flow. Without her there would be no war in the Middle East and without her there would have been no 9-11. Without her and her scheming, conspiratorial agenda, the world would live in relative peace and people could get on with the business of just being people and directing their lives in relative prosperity.

But all because of one nation, one tiny little nation, the whole world has to be thrown into chaos. Innocent people must die horrible deaths and live with the memories associated with indescribable tragedy. One little nation of people who consider themselves above everyone else, and Thorn does not quibble about this fact as virtually all other 'investigators' have done. While others cower in fear over the prospect of going up against the beast and of exposing the real mechanics of what is taking place, Thorn goes right to the heart of the matter, and the consequences be damned. He understands that what is taking place is deadly business and does not waste time in sounding the alarm for his fellow man. He is one of only a few doctors in town who will tell the truth--that smoking causes lung cancer--while all the others (who have been bought off by big tobacco interests) council their sick and dying patients to eat an apple a day and who mention nothing about cigarettes.

All persons of good will who genuinely want to rid the body of this cancer that is making life hell for so many people owe it to themselves to deal with the facts of this situation in a straightforward way. Thorn's *9-11 Evil* is one of those ways of beginning the process of flushing this evil cancer out of the body of mankind that will destroy everything if it is not stopped.
